

Standard 4.1 Impact on P-12 Students

To acquire impact-on-student-learning data, the EPP chair contacted a representative at each partner district's central office asking permission to communicate with completers and request they share their class' anonymous testing data. Data have been collected since 2016.

Data tables below show completers' impact on student learning growth.

Please see the data tables on following pages.

Tag 4.1 Impact on P-12 Students

**Completer Effectiveness completer impact in contributing to P-12 student-learning growth
Data for 2021-2022 School Year**

Completer's Graduation Year	Program	Partner District	Testing Year	Grade/Subject Tested/ Assessment	Number of Students	School Information	Testing Data
Spring 2022	ELEM.	Edmond Public Schools	2022-2023	1st	18	1 st year for school to be open – no public data available, yet	Pre-test class average: 62% Post-test class average: 77%
Fall 2021	ECED	Oklahoma Christian Academy	2022-2023	4th	37	70% Caucasian 30% non-Caucasian	Pre-test class average: 91% Post-test class average: +100%
Spring 2022	Vocal Music Ed.	Mid-Del Public Schools	2022-2023	9 th -12 th	8	27% Caucasian 73% non-Caucasian 66% Free/Reduced Lunch Eligible	Pre-test class average: 41% Post-test class average: 91%

**Completer Effectiveness completer impact in contributing to P-12 student-learning growth
Data for 2020-2021 School Year (2019-2020 Completers) ***

Completer's Graduation Year	Program	Partner District	Testing Year	Grade/Subject Tested/ Assessment	Number of Students	School Information	Testing Data
Spring 2021	ELEM.	Edmond	2021-2022	1st / Math Teacher-created assessment	21	24% non-Caucasian 13.1% free/reduced lunch	Pre-test class average: 47% Post-test class average: 59.7%

Tag 4.1 Impact on P-12 Students

Fall 2020	Sci. Ed.	Edmond	2021-2022	7 th /Science Teacher-created Assessment	116	35% non-Caucasian 17% free/reduced lunch	Pre-test class average: 44% Post-test class average: 85%
-----------	----------	--------	-----------	--	-----	---	---

*Completer effectiveness data were limited for 2020-2021 due to COVID and virtual learning in most public schools.

**Completer Effectiveness in Applying Professional Knowledge, Skills, and Dispositions
TLE Data Fall 2019-Spring 2020 Completers: Data provided from the State
The state did not provide data for 2020-2021 completers due to the pandemic
(Data received from the state in December 2021)**

Completer	Program	Cumulative TLE Score	Domain 1 Classroom Management	Domain 2 Instructional Effectiveness TLE sub-score	Domain 3 Professional Growth & Continuous Improvement	Domain 4 Interpersonal Skills	Domain 5 Leadership (Tulsa Model)	District	TLE Model: Marzano or Tulsa
1	Elem.	3.45	3.40	3.54	3.60	3.25	3.50	Tannelhill	Tulsa
2	S.S.	3.50	3.67	3.80	3.50	3.00	3.00	Moore	Tulsa
Range	NA	3.45-3.50	3.00-4.33	3.00-4.40	3.00-4.50	3.00-4.00	3.00-4.00		

Note: While the EPP had 14 first-year teachers on the state's roster, data were available for only two completers.

**Completer Effectiveness completer impact in contributing to P-12 student-learning growth
Data Received 2019-2020 School Year**

Instruments

1. Table 1 and following: The Star Early Literacy Assessment is produced by the Renaissance Learning. The assessment “measures early literacy...skills throughout the early primary grades (pre-K-3)” (Renaissance Learning, 2013, p. 2). Regarding reliability, the Star Early Literacy has an internal consistency reliability coefficient of 0.85 and a retest reliability of 0.79 (p. 20). Regarding validity, the assessment is aligned to state and national standards, including Common Core. Predictive validity studies in grades K-3 show a range of 0.52 to 0.67, and concurrent validity studies have a range of 0.52 to 0.68 (p. 21).
2. Table 1: The Biology End-of-Instruction Exam is produced by Measured Progress (a non-profit organization) for the State Department of Education. The exam assesses students’ knowledge of the Oklahoma PASS Biology Academic Standards. Reliability and validity data can be found on pages 55-60 and 66-67 of the technical document at (<http://sde.ok.gov/sde/sites/ok.gov.sde/files/documents/files/2015-16%20Oklahoma%20EOI%20Technical%20Report.pdf>).
3. Table 3: The Dynamic Indicators of Basic Early Literacy Skills (DIBELS) was created through the Institute for Research and Learning Disabilities at the University of Minnesota. “All DIBELS measures have estimated reliability in the .90s” (Good et al., 2004, p. 2) and “the DIBELS measures were also found to predict both oral reading fluency...” (Good, p. 2).
4. Table 3: The teacher-created unit assessments (fall 2017 data) were created by the completers. Assessment data came from pre- and post-tests following the Teacher Work Sample (TWS) instructions. (Candidates complete a full TWS during clinical practice and learn how to create valid and reliable pre- and post-tests and calculate learning gain scores.) Completers followed these same procedures to generate the assessment data.

Tag 4.1 Impact on P-12 Students

5. Table 3: AIMSWEB is a commercial product from Pearson. The assessments are designed for benchmark testing for math and reading. According to the Pearson website, the AIMSWEB is valid and reliable.

6. Table 4: Teacher-created unit assessments were created by the completers. Assessment data came from pre- and post-tests following the Teacher Work Sample (TWS) instructions. (Candidates complete a full TWS during clinical practice and learn how to create valid and reliable pre- and post-tests and calculate learning gain scores.) Completers followed these same procedures to generate the assessment data.

7. Table 5: Teacher-created unit assessments were created by the completers. Assessment data came from pre- and post-tests following the Teacher Work Sample (TWS) instructions. (Candidates complete a full TWS during clinical practice and learn how to create valid and reliable pre- and post-tests and calculate learning gain scores.) Completers followed these same procedures to generate the assessment data.

8. Table 5: District 3rd grade benchmark tests for reading and mathematics.

Note: At this time, there is no method to externally benchmark data from Standard 4.1.
